## SOFTWARE DEVELOPER

Dedicated and versatile Full-Stack Developer with a strong focus on front-end development, specializing in the **Next.js**, **MERN stack** and MVC architecture. Proficient in **JavaScript**, **Java**, **C++**, and **Python**, with a keen eye for designing intuitive user interfaces using **Figma** and **Framer**. Skilled in predictive modeling and database management (**MySQL**, **MongoDB**). Passionate about blending technical expertise and creative design to deliver impactful, user-centered solutions.

## SKILLS

**Web Technology:** HTML5, CSS, PHP, JavaScript, Supabase, MySQL, MongoDB, PostgreSQL, NodeJs, ExpressJs

**Framework:** NextJs, React JS, MERN Stack, Tailwind CSS

**Programming Languages:** C, C++, JAVA, Python

**UI/UX Design:** Figma, Framer

**Tools:** Git, GitHub, VS code, Xampp, Postman

**Project Management:** JIRA; strong knowledge of Agile and SCRUM methodologies

## PROFESSIONAL EXPERIENCE

### Junior Software Developer - CLAREx Ltd.

[View Website](#)

From Nov 2024 - continue

- Designed and developed **Clarex Ltd.**'s official website from scratch using Figma, Next.js, and After Effects.
- Built and deployed CLAREx Agro and CLAREx Tech websites with Next.js, ensuring responsive design and high performance.
- Currently developing **The Marvel — Be You** upcoming launch website using React.js, Node.js, and PostgreSQL.

## PROJECTS

### SpeakSail

[Live Link](#) | [GitHub](#)

- Developed a MERN stack application for interactive elementary English learning.
  - Enabled teachers to track progress and provide personalized feedback through stored audio and written responses.
- Demo: username: yeasin@example.com | password: StrongPassword123!

### AthletiHub

[GitHub](#)

- Built a MERN stack platform to manage commercial football turfs and esports tournaments.
- Integrated features for rent splitting, scheduling, and community engagement for athletes and gamers.

### UniHub

[GitHub](#)

- Created a PHP & MySQL platform for university students to connect, and trade study materials and TA/RA hiring.
- Included secure OTP authentication and a marketplace for buying/selling used books and equipment.

### Marvel of Tomorrow

[View Website](#)

- Developed a voting platform for The Marvel's Award Show using Next.js and Supabase.
- Handled live voting traffic of 100K+ users during the award show, ensuring high availability and smooth performance.

## EDUCATION & CERTIFICATIONS

### United International University (UIU)

BSc. in Computer Science and Engineering

Fall 2019 - Summer 2024

CGPA: 3.24

### Center for Development of IT Professionals (CDIP), UIU

Next.js & JavaScript
