SOFTWARE DEVELOPER

Innovative Full-Stack Developer with 1 year of hands-on experience bringing ideas to life — from **UI/UX design to full-scale development and deployment**. Skilled in **Next.js, the MERN stack, and MVC architecture**, I specialize in building fast, user-centric applications that blend performance with great design. With strong proficiency in **JavaScript, Java, C++, and Python**, and expertise in **MySQL and MongoDB**, I bridge the gap between creativity and technology. Passionate about crafting seamless digital experiences, I turn complex problems into elegant, functional solutions.

SKILLS

Web Technology: HTML5, CSS, PHP, JavaScript, Supabase, MySQL, MongoDB, PostgreSQL, NodeJs
Framework: NextJs, React JS, MERN, Tailwind CSS
Programming Languages: C, C++, JAVA, Python
UI/UX Design: Figma, Framer
Tools: Git, GitHub, VS code, Docker, Xampp, Postman
Project Management: JIRA; strong knowledge of Agile and SCRUM methodologies

PROFESSIONAL EXPERIENCE

Junior Software Developer - CLAREx Ltd.   **View Website**
From Nov 2024 - continue
- Developed and Deployed **The Marvel - Be You** highly complex project using React.js (Vite JS), Node.js, and PostgreSQL.
- Designed, Developed & Deployed **Clarex Ltd.**'s official website from scratch using Figma, Next.js, and After Effects.
- Built and deployed CLAREx Agro and CLAREx Tech websites with Next.js, ensuring responsive design and high performance.

PROJECTS

SpeakSail   **Live Link | GitHub**
- Developed a MERN stack application for interactive elementary English learning.
- Enabled teachers to track progress and provide personalized feedback through stored audio and written responses.
  Demo: username: yeasin@example.com | password: StrongPassword123!

Sonali e-Wallet   **Prototype Design**
- Redesigned and prototyped the **Sonali e-Wallet** mobile application using Figma — an honorary assignment and a significant professional achievement — and presented the new UI design before the Board of Directors of Sonali Bank.

AthletiHub   **GitHub**
- Built a MERN stack platform to manage commercial football turfs and esports tournaments.
- Integrated features for rent splitting, scheduling, and community engagement for athletes and gamers.

Marvel of Tomorrow   **View Website**
- Developed a voting platform for The Marvel's Award Show using Next.js and Supabase.
- Handled live voting traffic of 100K+ users during the award show, ensuring high availability and smooth performance.
